Overview

Microsoft Office is the most used productivity tool in the world. Office 365 is the subscription based product from Microsoft that allows for monthly updates and whole lot of cloud based functionality that makes working as teams super productive.

This course teaches you the most productive features and techniques of the latest version of Office 365 (with emphasis on Word, Excel, PowerPoint, Outlook and Teams). You can expect hours of time savings each day by using these techniques.

This course is a blended course. You start with a rigorous online pre-work with short videos covering knowledge objectives. Then you have 3 options to continue with the course:

1. 3 days classroom session (7 hours a Day)
2. 6 Weeks of highly interactive Virtual Training (2 hrs a Week)
3. Online Self-Paced, all of the content at your own pace whenever you want to start.

Learning Outcomes

By the end of the course, you will be able to:

- practice the basic features of Office 365 via an eLearning platform
- organize and manage email productively with Outlook
- implement advanced rules and automations in Outlook
- identify and practice best practices for handling the most common analysis challenges in Excel
- Interpret exactly how the Excel engine works and use this knowledge to proffer solutions to various case study based exercises in class
- apply the most productive Automation features available in Word to cut down document creation and editing time
- effectively utilize similar features across the office suite: shapes, tables, pictures, SmartArt
- build engaging presentations by harnessing storytelling tools in PowerPoint

“

The dbrown team made assimilating the volume of knowledge so easy! The competitive streak method used also made me eager to learn and perform better. The trainer's sense of humor also kept the class lively. Overall, I couldn't have learnt the office 365 tools better from anywhere else.
